INDEX OF SUBJECTS

A

Adenoma. — . . . of the salivary gland (*Schultz*) - - - - - - - - - 153

Adenomas. — . . . of the islands of Langerhans (*Warren*) - - - - - 335

Adiposis dolorosa. — A case of . . . with necropsy (*Foot, Good and Ménard*) - 251

Adiposis dolorosa. — A case of . . . ("Dercum's disease") with necropsy (*Foot*) - 483*

Allergic states. — A supravital study of leucocytes in . . .; a comparison of delayed and immediate intrapleural anaphylactic reactions (*Long and Stewart*) - 91

Anemia. — Foreign particles as a cause of blood crises and . . . (*Elvidge*) 189

Anemia. — Multiple necroses of spleen (Feitis) in pernicious . . . (*Schultz and Enzer*) - - - - - - - - - - - - - - - - - - - 470*

Animals. — A study of the tumor incidence in the lower . . . (*Feldman*) 554

Antitoxin. — The preparation and concentration of scarlet fever . . . and its clinical applications (*Anderson and Leonard*) - - - - - - 440*

Antitoxin. — Standardization of scarlet fever . . . (*Park*) - - - - - - 443*

Antitoxins. — Further observations on the streptococcus toxins and their . . . and the standardization of therapeutic serums (*Kirkbride and Wheeler*) - 440*

Aortitis. — A case of rheumatic . . . with early lesions in the media (*Pappenheimer and VonGlahn*) - - - - - - - - - - - - - - - 15

Appendix. — Some unusual findings in the vermiform . . . (*Plaut*) - - 484*

Arterioles. — Hyaline degeneration of . . . and capillaries: experimental production in animals (*Williams and McIlroy*) - - - - - 480*

Atresia. — A rare case of multiple congenital . . . of the ileum with complete separation of a segment of bowel (*Erb*) - - - - - - - 137

Atrophy. — Contributions to liver pathology in acute yellow . . . and fatal phosphorous poisoning (*Killian and Klemperer*) - - - - - - 465*

Auricular. — . . . endocarditis of rheumatic origin (*VonGlahn*) - - - 1

Autoplastic transplants. — On diminished resistance following suprarenalectomy in the rat and the protection afforded by . . . (*Jaffe*) - 421

Autotransplantation. — Further observations on . . . and homoiotransplantation of thyroid gland in the guinea-pig (*Loeb*) - - - - 99

Autotransplantation. — . . . and homoiotransplantation of cartilage and bone in the rat (*Loeb*) - - - - - - - - - - - - - - - - 315

* Abstract of paper presented at the meeting of the Association of Pathologists and Bacteriologists held at Albany, N. Y., April 2 and 3, 1926.

Autotransplantation. — . . . and homoiotransplantation of cartilage in the guinea-pig (*Loeb*) - - - - - - - - - - - - - - - 111
Autotransplantation. — . . . and homoiotransplantation of the thyroid gland in the rat (*Loeb*) - - - - - - - - - - - - - - - - 301

B

Bacteria. — New methods for study of the serum sensitization of the acid-fast . . . (*Mudd and Mudd*) - - - - - - - - - - - - - 448*
Bacteria. — The passage of . . . from the peritoneal cavity into capillaries and lymphatics in colon bacillus peritonitis (*Steinberg and Goldblatt*) - 454*
Bacteria. — Undulant fever in man associated with . . . indistinguishable from *Brucella abortus* (*Moore and Carpenter*) - - - - - - - 455*
Bacterial. — . . . synergism (*Holman*) - - - - - - - - - - - - - 452*
Bilharziosis. — A case of carcinoma of the colon associated with schistosomiasis (. . .) in a young woman (*Roman and Burke*) - - - - - 539
Blockade. — So-called " endothelial . . ." with collargol; an immunologic and histologic study (*Stewart and Parker*) - - - - - - - - 381
Blood. — The chemistry of the coagulation of the . . . (*Maltaner and Maltaner*) - 450*
Blood crises. — Foreign particles as a cause of . . . and anemia (*Elvidge*) - 189
Blood cultures. — Observation of formation of giant cells in turtle . . . (*Cohen*) - 431, 474*
Blood sugar. — Comparison of the changes in . . . following injections of filtrates of *B. paratyphosus B* and of histamine (*Menten and Krugh*) - 484*
Blood sugar. — Comparison of the changes in . . . produced by injections of Witte's peptone and of filtrates of *B. paratyphosus B* (*Menten and Manning*) - 484*
Blood sugar. — Hyperglycemia as result of vital staining with certain dyes. The relation of the microscopic distribution of the dye to the . . . level (*Zeckwer*) - 479*
Blood vessels. — Decidual cells in . . . (*Mallory*) - - - - - - - - 466*
Blood vessels. — Specific lesions of peripheral . . . in rheumatism (*Von-Glahn and Pappenheimer*) - - - - - - - - - - - - - - - 235, 470*
Bone. — Autotransplantation and homoiotransplantation of cartilage and . . . in the rat (*Loeb*) - - - - - - - - - - - - - - - - 315
Bone marrow. — A study of hyperplasia of the . . . in man (*Peabody*) 487
B. paratyphosus B. — Comparison of the changes in blood sugar produced by injections of Witte's peptone and of filtrates of . . . (*Menten and Manning*) - 484*
B. paratyphosus B. — Comparison of the changes in blood sugar following injections of filtrates of . . . and of histamine (*Menten and Krugh*) - 484*
Brucella abortus. — A comparison of strains of . . . isolated from man with those from cattle (*Carpenter*) - - - - - - - - - - - - - - 455*
Brucella abortus. — Undulant fever in man associated with bacteria indistinguishable from . . . (*Moore and Carpenter*) - - - - - - - 455*

C

Capillaries. — Hyaline degeneration of arterioles and . . .: experimental production in animals (*Williams and McIlroy*) - - - - - - - - 480*

Carcinoma. — A case of . . . of the colon associated with schistosomiasis (bilharziosis) in a young woman (*Roman and Burke*) - - - - 539

Carcinoma. — The cause of death in . . . cases (*Warwick*) - - - - 460*

Carcinoma. — Concerning " malignant thymoma "; with a report on a case of primary . . . of the thymus (*Foot*) - - - - - - - - - 33

Carcinoma. — The filterability of the mouse sarcoma and . . . (*Sittenfield*) - 459*

Carcinoma. — Histological picture and prognosis in . . . of uterine cervix (*Plaut*) - - - - - - - - - - - - - - - - - - 461*

Carcinoma. — Primary . . . of the liver of possible multicentric origin occurring in a case of portal cirrhosis (*McIndoe and Counseller*) - - 557

Carcinoma. — Primary gelatinous cylindrical cell . . . of the lung (*Hueper*) - 81

Cardiac. — Myocardial changes in . . . defects (*Abbott*) - - - - - 468*

Cartilage. — Autotransplantation and homoiotransplantation of . . . and bone in the rat (*Loeb*) - - - - - - - - - - - - - - - 315

Cartilage. — Autotransplantation and homoiotransplantation of . . . in the guinea-pig (*Loeb*) - - - - - - - - - - - - - - - - 111

Cartilage. — Heterotransplantation of . . . and fat tissue and the reaction against heterotransplants in general (*Loeb and Harter*) - - - 521

Caseation. — Giant cells and their relation to . . . in tuberculosis (*Medlar*) - 291, 474*

Caseation. — A study of the process of . . . in tuberculosis (*Medlar*) 275, 475*

Cat. — The persistence of the glomerular circulation following occlusion of the renal vein of one kidney in the cat (*Zeckwer*) - - - - 57

Cervix. — Histological picture and prognosis in carcinoma of uterine . . . (*Plaut*) - 461*

Chloroform. — Studies on the effect of . . . on the liver of rabbits (*de Zalka*) - 167

Cinchonics. — The effect of . . . on pneumococci. I. The influence of quinin upon proliferation and autolysis of pneumococci, with special reference to the effect of hydrogen ion concentration (*Solis-Cohen*) 444*

Cinchonics. — The effect of . . . on pneumococci. II. Contrasted behavior of pneumococci toward quinin and optochin in relation to drug fastness (*Solis-Cohen*) - - - - - - - - - - - - - - - 445*

Circulation. — The open . . . of the spleen pulp (*MacNeal*) - - - - 473*

Cirrhosis. — The pathogenesis of . . . of the liver (*Goldzieher*) - - - 466*

Cirrhosis. — Primary carcinoma of the liver of possible multicentric origin occurring in a case of portal . . . (*McIndoe and Counseller*) 557

Coagulation. — The chemistry of the . . . of the blood (*Maltaner and Maltaner*) - 450*

Collargol. — So-called " endothelial blockade " with . . .; an immunologic and histologic study (*Stewart and Parker*) - - - - - - - - 381

Colon. — A case of carcinoma of the . . . associated with schistosomiasis (bilharziosis) in a young woman (*Roman and Burke*) - - - 539

Colon bacillus. — The passage of bacteria from the peritoneal cavity into capillaries and lymphatics in . . . peritonitis (*Steinberg and Goldblatt*) - 454*

Compensatory. — Studies on . . . hypertrophy of the thyroid gland. VII. Further investigation of the influence of iodin on hypertrophy of the thyroid gland with an interpretation of the differences in the effects of iodin on the thyroid gland under various pathologic conditions (*Loeb*) - 19

Cultures. — Supravital staining of . . . of lymph node and liver endothelium (*McJunkin*) - - - - - - - - - - - - - - - - - 477*

Cystitis emphysematosa. — . . . (*Hueper*) - - - - - - - - - - - 159

D

Decidual cells. — . . . in blood vessels (*Mallory*) - - - - - - - - - 466*

Dercum's disease. — A case of adiposis dolorosa (" . . .") with necropsy (*Foot*) - 483*

Diabetes. — Lipoid-containing cells in the spleen in . . . with lipemia (*Warren and Root*) - - - - - - - - - - - - - - - - - - 69

Diphtheria bacillus. — A pathogenic bacillus resembling the . . . (*Gilbert and Stewart*) - 453*

Drug fastness. — The effect of cinchonics on pneumococci. II. Contrasted behavior of pneumococci toward quinin and optochin in relation to . . . (*Solis-Cohen*) - - - - - - - - - - - - - - - - 445*

Dye. — Hyperglycemia as result of vital staining with certain dyes. The relation of the microscopic distribution of the . . . to the blood sugar level (*Zeckwer*) - - - - - - - - - - - - - - - - - - 479*

E

Embolism. — A bacteriologic study in cases of postoperative thrombosis and . . . (*Rosenow*) - - - - - - - - - - - - - - - - - - 439*

Encephalitis. — Microscopic lesions of the central nervous system in rabbits injected with streptococci from . . ., spasmodic torticollis and poliomyelitis (*Rosenow and Balado*) - - - - - - - - - - - - - 457*

Endocarditis. — Auricular . . . of rheumatic origin (*VonGlahn*) - - - 1

Endothelial. — So-called " . . . blockade " with collargol; an immunologic and histologic study (*Stewart and Parker*) - - - - - - - - 381

Endothelium. — Supravital staining of cultures of lymph node and liver . . . (*McJunkin*) - 477*

Erythema arthriticum epidemicum. — The etiology of Haverhill fever (. . .) (*Parker and Hudson*) - - - - - - - - - - - - - - - - 357

F

Fat tissue. — Heterotransplantation of cartilage and . . . and the reaction against heterotransplants in general (*Loeb and Harter*) - - 521

Fibril. — . . . formation by human lutein cells (*Cook*) - - - - - - - 503

Filterability. — The . . . of the mouse sarcoma and carcinoma (*Sittenfield*) - 459*
Filtration. — . . . with "oiled" filters (*Holman*) - - - - - - - - 483*
Foreign particles. — . . . as a cause of blood crises and anemia (*Elvidge*) 189

G

Giant cells. — . . . and their relation to caseation in tuberculosis (*Medlar*) - 291, 474*
Giant cells. — Observation of formation of . . . in turtle blood cultures (*Cohen*) - 431, 474*
Giant cells. — The significance of . . . in the intradermal tuberculin reaction (*Stewart and Rhoads*) - - - - - - - - - - - - - - - 571
Gliomatosis. — Secondary . . . of the leptomeninges (*Brannan*) - - 123
Glomerular circulation. — The persistence of the . . . following occlusion of the renal vein of one kidney in the cat (*Zeckwer*) - - - - - - 57
Glomerulonephritis. — Experimental embolic . . . (*Clawson*) - - - - - 481*
Goiter. — Histologic changes in exophthalmic . . . following the administration of iodine (*Giordano*) - - - - - - - - - - - - - - 482*
Guinea-pig. — Autotransplantation and homoiotransplantation of cartilage in the . . . (*Loeb*) - - - - - - - - - - - - - - - - - - 111
Guinea-pig. — Further observations on autotransplantation and homoiotransplantation of thyroid gland in the . . . (*Loeb*) - - - - - - 99

H

Haverhill fever. — The etiology of . . . (Erythema arthriticum epidemicum) (*Parker and Hudson*) - - - - - - - - - - - - - - - - - 357
Heart. — Valvular diseases of the . . .; with special reference to the pathogenesis of old valvular defects (*Clawson, Bell and Hartzell*) - - 193
Hematopoietic tissues. — Methylene azure B in staining sections of . . . (*MacNeal and Otoni*) - - - - - - - - - - - - - - - - - - - 478*
Heterotransplantation. — . . . of cartilage and fat tissue and the reaction against heterotransplants in general (*Loeb and Harter*) - - - - - - 521
Hiccup. — Epidemic . . .: animal experiments and microscopic lesions of brain and cord in one case (*Rosenow and Parker*) - - - - - - - 456*
Histamine. — Comparison of the changes in blood sugar following injections of filtrates of *B. paratyphosus B* and of . . . (*Menten and Krugh*) - 484*
Homoiotransplantation. — Autotransplantation and . . . of cartilage and bone in the rat (*Loeb*) - - - - - - - - - - - - - - - - 315
Homoiotransplantation. — Autotransplantation and . . . of cartilage in the guinea-pig (*Loeb*) - - - - - - - - - - - - - - - - - - - 111
Homoiotransplantation. — Autotransplantation and . . . of the thyroid gland in the rat (*Loeb*) - - - - - - - - - - - - - - - - - - 301
Homoiotransplantation. — Further observations on autotransplantation and . . . of thyroid gland in the guinea-pig (*Loeb*) - - - - - - - 99
Hyaline degeneration. — . . . of arterioles and capillaries: experimental production in animals (*Williams and McIlroy*) - - - - - - - - 480*

Hydrogen ion concentration. — The effect of cinchonics on pneumococci. I. The influence of quinin upon proliferation and autolysis of pneumococci, with special reference to the . . . (*Solis-Cohen*) - - - - 444*

Hyperglycemia. — . . . as result of vital staining with certain dyes. The relation of the microscopic distribution of the dye to the blood sugar level (*Zeckwer*) - - - - - - - - - - - - - - - - - - 479*

Hyperplasia. — A study of . . . of the bone marrow in man (*Peabody*) 487

Hypertrophy. — Studies on compensatory . . . of the thyroid gland. VII. Further investigation of the influence of iodin on . . . of the thyroid gland with an interpretation of the differences in the effects of iodin on the thyroid gland under various pathologic conditions (*Loeb*) - 19

I

Ileum. — A rare case of multiple congenital atresia of the . . . with complete separation of a segment of bowel (*Erb*) - - - - - - - 137

Immunity. — Studies on . . . to tuberculosis (*Willis*) - - - - - - - 446*

India ink. — The effect of intravenous injections of . . . in the immunized animal (*Jungeblut and Berlot*) - - - - - - - - - - - - 446*

Intestinal tuberculosis. — Healing in . . . (*Gardner*) - - - - - - - 475*

Intradermal. — The significance of giant cells in the . . . tuberculin reaction (*Stewart and Rhoads*) - - - - - - - - - - - - - - - 571

Iodin. — Studies on compensatory hypertrophy of the thyroid gland. VII. Further investigation of the influence of . . . on hypertrophy of the thyroid gland with an interpretation of the differences in the effects of . . . on the thyroid gland under various pathologic conditions (*Loeb*) - 19

Iodine. — Histologic changes in exophthalmic goiter following the administration of . . . (*Giordano*) - - - - - - - - - - - - - - - 482*

Iris. — A satisfactory method for the staining of the nerve fibers of the . . . (*Balado*) - 482*

Islands of Langerhans. — Adenomas of the . . . (*Warren*) - - - - - 335

J

Jaundice. — On the pathology of catarrhal . . . (*Klemperer and Killian*) 464*

K

Kidney. — The persistence of the glomerular circulation following occlusion of the renal vein of one . . . in the cat (*Zeckwer*) - - - - 57

L

Leptomeninges. — Secondary gliomatosis of the . . . (*Brannan*) - - - - 123

Leucocytes. — The fate of reacting . . . in the tuberculin and reinfection reactions (*Stewart, Long and Bradley*) - - - - - - - - - - 47

Leucocytes. — A supravital study of . . . in allergic states; a comparison of delayed and immediate intrapleural anaphylactic reactions (*Long and Stewart*) - 91

Lipemia. — Lipoid-containing cells in the spleen in diabetes with . . . (*Warren and Root*) - - - - - - - - - - - - - - - - - - - 69
Lipoid-containing cells. — . . . in the spleen in diabetes with lipemia (*Warren and Root*) - - - - - - - - - - - - - - - - - - - 69
Liver. — Contributions to . . . pathology in acute yellow atrophy and fatal phosphorous poisoning (*Killian and Klemperer*) - - - - 465*
Liver. — The pathogenesis of cirrhosis of the . . . (*Goldzieher*) - - - 466*
Liver. — Primary carcinoma of the . . . of possible multicentric origin occurring in a case of portal cirrhosis (*McIndoe and Counseller*) - - 557
Liver. — Studies on the effect of chloroform on the . . . of rabbits (*de Zalka*) - 167
Liver. — Supravital staining of cultures of lymph node and . . . endothelium (*McJunkin*) - - - - - - - - - - - - - - - - - - 477*
Lung. — Primary gelatinous cylindrical cell carcinoma of the . . . (*Hueper*) - 81
Lutein cells. — Fibril formation by human . . . (*Cook*) - - - - - - 503
Lymph node. — Supravital staining of cultures of . . . and liver endothelium (*McJunkin*) - - - - - - - - - - - - - - - - - - 477*

M

Malpighian bodies. — Necrosis of the . . . of the spleen (*Enzer*) - - - 511
Man. — The histopathology of the subcutaneous lesions in tularemia in . . . (*Permar and Weil*) - - - - - - - - - - - - - - - - 263
Man. — A study of hyperplasia of the bone marrow in . . . (*Peabody*) 487
Methylene azure B. — . . . in staining sections of hematopoietic tissues (*MacNeal and Otoni*) - - - - - - - - - - - - - - - - - - 478*
Mouse. — The filterability of the . . . sarcoma and carcinoma (*Sittenfield*) - 459*
Myocardial. — . . . changes in cardiac defects (*Abbott*) - - - - - - 468*

N

Necroses. — Multiple . . . of spleen (Feitis) in pernicious anemia (*Schultz and Enzer*) - - - - - - - - - - - - - - - - - - - 470*
Necrosis. — . . . of the Malpighian bodies of the spleen (*Enzer*) - - - 511
Nerve fibers. — A satisfactory method for the staining of the . . . of the iris (*Balado*) - 482*

O

Oiled filters. — Filtration with " . . ." (*Holman*) - - - - - - - - 483*
Optochin. — The effect of cinchonics on pneumococci. II. Contrasted behavior of pneumococci toward quinin and . . . in relation to drug fastness (*Solis-Cohen*) - - - - - - - - - - - - - - - 445*
Osteitis fibrosa. — The solid type of . . . (*McCartney*) - - - - - - 463*

P

Peptone. — Comparison of the changes in blood sugar produced by injections of Witte's . . . and of filtrates of *B. paratyphosus B* (*Menten and Manning*) - - - - - - - - - - - - - - - - - - - 484*

Peritoneal cavity. — The passage of bacteria from the . . . into capillaries and lymphatics in colon bacillus peritonitis (*Steinberg and Goldblatt*) - 454*

Peritonitis. — Experimental production of general . . . ; with an anatomic study (*Steinberg*) - - - - - - - - - - - - - - - - 415*

Peritonitis. — The passage of bacteria from the peritoneal cavity into capillaries and lymphatics in colon bacillus . . . (*Steinberg and Goldblatt*) - 454*

Pernicious. — Multiple necroses of spleen (Feitis) in . . . anemia (*Schultz and Enzer*) - 470*

Phosphorous. — Contributions to liver pathology in acute yellow atrophy and fatal . . . poisoning (*Killian and Klemperer*) - - - - - - - 465*

Pneumococci. — The effect of cinchonics on . . . I. The influence of quinin upon proliferation and autolysis of . . . with special reference to the effect of hydrogen ion concentration (*Solis-Cohen*) - - 444*

Pneumococci. — The effect of cinchonics on . . . II. Contrasted behavior of . . . toward quinin and optochin in relation to drug fastness (*Solis-Cohen*) - - - - - - - - - - - - - - - - - - - 445*

Poisoning. — Contributions to liver pathology in acute yellow atrophy and fatal phosphorous . . . (*Killian and Klemperer*) - - - - - - 465*

Poliomyelitis. — Microscopic lesions of the central nervous system in rabbits injected with streptococci from encephalitis, spasmodic torticollis and . . . (*Rosenow and Balado*) - - - - - - - - - - 457*

Pulmonary tuberculosis. — Cases of renal infection in . . .; evidence of healed tuberculous lesions (*Medlar*) - - - - - - - - - - - - - 401

Q

Quinin. — The effect of cinchonics on pneumococci. I. The influence of . . . upon proliferation and autolysis of pneumococci, with special reference to the effect of hydrogen ion concentration (*Solis-Cohen*) - 444*

Quinin. — The effect of cinchonics on pneumococci. II. Contrasted behavior of pneumococci toward . . . and optochin in relation to drug fastness (*Solis-Cohen*) - - - - - - - - - - - - - - - - - - - 445*

R

Rabbits. — Microscopic lesions of the central nervous system in . . . injected with streptococci from encephalitis, spasmodic torticollis and poliomyelitis (*Rosenow and Balado*) - - - - - - - - - - - - - 457*

Rabbits. — Studies on the effect of chloroform on the liver of . . . (*de Zalka*) - 167

Rat. — Autotransplantation and homoiotransplantation of cartilage and bone in the . . . (*Loeb*) - - - - - - - - - - - - - - - - - - - 315

Rat. — Autotransplantation and homoiotransplantation of the thyroid gland in the . . . (*Loeb*) - - - - - - - - - - - - - - - - - - - 301

Rat. — On diminished resistance following suprarenalectomy in the . . . and the protection afforded by autoplastic transplants (*Jaffe*) 421

Reinfection reactions. — The fate of reacting leucocytes in the tuberculin and . . . (*Stewart, Long and Bradley*) - - - - - - - - - - 47

Renal infection. — Cases of . . . in pulmonary tuberculosis: evidence of healed tuberculous lesions (*Medlar*) - - - - - - - - - - - 401
Resistance. — On diminished . . . following suprarenalectomy in the rat and the protection afforded by autoplastic transplants (*Jaffe*) - 421
Rheumatic. — Auricular endocarditis of . . . origin (*VonGlahn*) - - 1
Rheumatic. — A case of . . . aortitis with early lesions in the media (*Pappenheimer and VonGlahn*) - - - - - - - - - - - - - 15
Rheumatism. — Specific lesions of peripheral blood vessels in . . . (*VonGlahn and Pappenheimer*) - - - - - - - - - - - - - 235, 470*

S

Salivary gland. — Adenoma of the . . . (*Schutz*) - - - - - - - - - 153
Sarcoma. — The filterability of the mouse . . . and carcinoma (*Sittenfield*) - 459*
Scarlatina. — Factors influencing the potency of . . . toxin (*Williams*) 444*
Scarlet fever. — The preparation and concentration of . . . antitoxin and its clinical applications (*Anderson and Leonard*) - - - - - - 440*
Scarlet fever. — Standardization of . . . antitoxin (*Park*) - - - - - - 443*
Schistosomiasis. — A case of carcinoma of the colon associated with . . . (bilharziosis) in a young woman (*Roman and Burke*) - - - 539
Sensitization. — New methods for study of the serum . . . of the acid-fast bacteria (*Mudd and Mudd*) - - - - - - - - - - - - - - 448*
Spleen. — Lipoid-containing cells in the . . . in diabetes with lipemia (*Warren and Root*) - - - - - - - - - - - - - - - - - - - 69
Spleen. — Multiple necroses of . . . (Feitis) in pernicious anemia (*Schultz and Enzer*) - 470*
Spleen. — Necrosis of the Malpighian bodies of the . . . (*Enzer*) - - - 511
Spleen. — The open circulation of the . . . pulp (*MacNeal*) - - - - 473*
Spleen. — The vascular mechanism of the . . . (*Robinson*) - - - 341, 471*
Staining. — Hyperglycemia as result of vital . . . with certain dyes. The relation of the microscopic distribution of the dye to the blood sugar level (*Zeckwer*) - - - - - - - - - - - - - - - - - - 479*
Staining. — Methylene azure B in . . . sections of hematopoietic tissues (*MacNeal and Otoni*) - - - - - - - - - - - - - - - - - 478*
Staining. — A satisfactory method for the . . . of the nerve fibers of the iris (*Balado*) - 482*
Staining. — Supravital . . . of cultures of lymph node and liver endothelium (*McJunkin*) - - - - - - - - - - - - - - - - - - - 477*
Standardization. — Further observations on the streptococcus toxins and their antitoxins and the . . . of therapeutic serums (*Kirkbride and Wheeler*) - 440*
Standardization. — . . . of scarlet fever antitoxin (*Park*) - - - - - - 443*
Streptococci. — Microscopic lesions of the central nervous system in rabbits injected with . . . from encephalitis, spasmodic torticollis and poliomyelitis (*Rosenow and Balado*) - - - - - - - - - - 457*
Streptococcus. — Further observations on the . . . toxins and their antitoxins and the standardization of therapeutic serums (*Kirkbride and Wheeler*) - 440*

Subcutaneous lesions. — The histopathology of the . . . in tularemia in man (*Parmar and Weil*) - - - - - - - - - - - - - - - 263, 476*

Suprarenalectomy. — On diminished resistance following . . . in the rat and the protection afforded by autoplastic transplants (*Jaffe*) - 421

Synergism. — Bacterial . . . (*Holman*) - - - - - - - - - - - - 452*

T

Therapeutic serums. — Further observations on the streptococcus toxins and their antitoxins and the standardization of . . . (*Kirkbride and Wheeler*) - 440*

Thrombosis. — A bacteriologic study in cases of postoperative . . . and embolism (*Rosenow*) - - - - - - - - - - - - - - - - - - 439*

Thymoma. — Concerning " malignant . . ."; with a report on a case of primary carcinoma of the thymus (*Foot*) - - - - - - - - - - - 33

Thymus. — Concerning " malignant thymoma "; with a report on a case of primary carcinoma of the . . . (*Foot*) - - - - - - - - - - - 33

Thyroid gland. — Autotransplantation and homoiotransplantation of the . . . in the rat (*Loeb*) - - - - - - - - - - - - - - - - - - 301

Thyroid gland. — Further observations on autotransplantation and homoiotransplantation of . . . in the guinea-pig (*Loeb*) - - - - - - 99

Thyroid gland. — Studies on compensatory hypertrophy of the . . . VII. Further investigation of the influence of iodin on hypertrophy of the . . . with an interpretation of the differences in the effects of iodin on the . . . under various pathologic conditions (*Loeb*) - - - - - 19

Torticollis. — Microscopic lesions of the central nervous system in rabbits injected with streptococci from encephalitis, spasmodic . . . and poliomyelitis (*Rosenow and Balado*) - - - - - - - - - 457*

Toxin. — Factors influencing the potency of scarlatina . . . (*Williams*) 444*

Toxins. — Further observations on the streptococcus . . . and their antitoxins and the standardization of therapeutic serums (*Kirkbride and Wheeler*) - 440*

Tuberculin. — The fate of reacting leucocytes in the . . . and reinfection reactions (*Stewart, Long and Bradley*) - - - - - - - - - 47

Tuberculin reaction. — The significance of giant cells in the intradermal . . . (*Stewart and Rhoads*) - - - - - - - - - - - - - - - - - 571

Tuberculosis. — Cases of renal infection in pulmonary . . .; evidence of healed tuberculous lesions (*Medlar*) - - - - - - - - - - - 401

Tuberculosis. — Giant cells and their relation to caseation in . . . (*Medlar*) - 291, 474*

Tuberculosis. — Healing in intestinal . . . (*Gardner*) - - - - - - - 475*

Tuberculosis. — Studies on immunity to . . . (*Willis*) - - - - - - - 446*

Tuberculosis. — A study of the process of caseation in . . . (*Medlar*) 275, 475*

Tuberculous lesions. — Cases of renal infection in pulmonary tuberculosis; evidence of healed . . . (*Medlar*) - - - - - - - - - - - 401

Tularemia. — The histopathology of the subcutaneous lesions in . . . in man (*Permar and Weil*) - - - - - - - - - - - - - - - - 263, 476*

Tumor incidence. — A study of the . . . in the lower animals (*Feldman*) 545

Turtle. — Observation of formation of giant cells in . . . blood cultures (*Cohen*) - 431, 474*

U

Undulant fever. — . . . in man associated with bacteria indistinguishable from *Brucella abortus* (*Moore and Carpenter*) - - - - - - - 455

V

Valvular defects. — The pathogenesis of old . . . (*Clawson and Bell*) - 469*
Valvular diseases. — . . . of the heart; with special reference to the pathogenesis of old valvular defects (*Clawson, Bell and Hartzell*) - - 193
Vasa vasorum. — Studies on the . . . (*Woodruff*) - - - - - - - - - 567
Vascular mechanism. — The . . . of the spleen (*Robinson*) - - - 341, 471*
